

A Resolution To Increase Senior AI Fraud Awareness

Proposal:

We ask for bipartisan support and sponsorship of a resolution to declare June 13-19th Senior AI Safety Awareness Week to raise awareness, promote further precautions and timely reporting, and help reduce the effectiveness of AI-enabled scams targeting seniors.

Why is this a problem?

- Generative AI and other forms of Artificial intelligence have made it increasingly easy to commit fraud and deception towards seniors and the elderly.
- In 2024, [older adults reported \\$377 million lost to business imposters and \\$375 million to government imposters.](#)
- The advent of generative AI has allowed these scams to increase in quality and quantity, as calls and phishing scams have become incredibly more realistic and deepfakes are more convincing
- Last year, [AI scams led to nearly 893 Million Dollars in losses due to voice cloning and deepfakes](#) to all Americans along with other forms of AI fraud and scams.
- **How does the proposed Resolution correct that problem?**
 - Senior AI Fraud Awareness Week encourages financial institutes and local resources that reach seniors more effectively, such as libraries and financial institutions along with
 - More up to date resources and action plans can correct misinformation, giving seniors resources they need where they are most likely to find them
- **What does this resolution not do?**
 - Mandate, require, or force any funding / action on local communities or organizations.
 - Create new obligations / reporting agencies or amend any existing statute.

Recent Precedent -

[Michigan HR275](#) - World Elder Abuse Awareness Day, encouraged greater recognition and reporting of elderly-targeted scams

[Michigan HR120](#)- Declared June as Elder Abuse Awareness Month

[Illinois SR284](#) - Declared Illinois Senate intent to eradicate financial abuse of older adults.

[Federal AI Fraud Accountability Act](#) - Increase Protection against digital impersonation fraud.
